

Addendum #2; Roof Replacement Design Services RFP

In order to get a more equitable evaluation of the proposals for the Roof Design RFP for the eight roofs due on November 9, 2009, we need a more detailed breakdown of your design costs and total cost for each roof project showing estimated hours and wage rates. This breakdown should include all in-house engineering or sub-consultant hours and rates for electrical, mechanical, structural, masonry, windows or skylight replacement, asbestos surveys, etc. as may be required for each project, along with reimbursable and administrative fees for each project.

Provide these cost breakdowns as an attachment to the cost table requested in the RFP.
